Basin salinity management 2030: strategies and reports. Salinity is a significant management challenge and poses ongoing environmental, social and economic risks in the Murray-Darling Basin.

Basin salinity management 2030: strategies and reports

The Santa Ana River drains the largest watershed of California's South Coast region, covering 2,650 square miles (6,900 km²) in parts of San Bernardino, Riverside, Orange and Los Angeles Counties. Although the river does not pass through Los Angeles County, some of its tributaries, including San Antonio Creek extend into it. The watershed consists mainly of high mountain ranges that surround ...

1. Introduction. One of the largest risks to people living in urban areas in the developing world is a lack of improved water, sanitation and hygiene (WASH) provision .Access to water and sanitation is an important factor in determining social vulnerability to natural hazards, not only for meeting immediate needs, but also for the wider application of relevant disaster prevention .

Strategies for building resilience to hazards in water

The Missouri River is the longest river in North America. Rising in the Rocky Mountains of western Montana, the Missouri flows east and south for 2,341 miles (3,767 km) before entering the Mississippi River north of St. Louis, Missouri. The river takes drainage from a sparsely populated, semi-arid watershed of more than half a million square miles (1,300,000 km²), which includes parts of ten U ...

Water Audit Cases Studies - The Emerging Use of Water Audits in the United States Water Utility Sector. Historically, the water auditing process has been in use inconsistently and sporadically in North America.

Water Audit Case Studies - allianceforwaterefficiency.org

To provide flexibility, the Basin Plan includes a mechanism to adjust sustainable diversion limits in the southern Basin. The mechanism requires a suite of projects to be implemented – some projects allow Basin Plan environmental outcomes to be achieved with less water. This means that more water can remain in the system for other users, including households, industry and irrigated agriculture.
