A strong trumpet embouchure is of little value if it is not flexible and a flexible embouchure is of little value if it is not strong. Practiced correctly, this book will build both strength and flexibility into your embouchure, while giving you endurance that will allow you to play for hours without tiring.

Diisocyanates are linear molecules with two ends that can react with hydroxyl groups to form carbamate bonds. The hydroxyl groups lining the skeleton of silica gels are perfect candidates for reacting with diisocyanates, and since diisocyanates have two reactive ends, they can bond to the aerogel skeleton twice.
